## PROJECTS

---

- **Home automisation without human command(ongoing)**  
This technology is something new that it detects the human requirmnet and starts the functioning of the gadgets for ex:air conditioner, Ceiling fan.  
We have technologies like we can turn on ac by using mobile phone but we built something new without human intervation and if human body requires to sit in cooling room the appliances directly start working by taking the command from an device which needs to be weared by human.  
Its an algorithm we built.
